

The image features the Dyson brand logo, which consists of the word "dyson" in a bold, lowercase, sans-serif typeface. Below the "dyson" text, the word "Vacuum" is written in a smaller, bold, uppercase, sans-serif font. The entire text is centered on a white background. Surrounding the text are several overlapping triangles in shades of light green and light grey, creating a geometric pattern. The triangles vary in size and orientation, some pointing upwards and others downwards, creating a dynamic and modern aesthetic.

Dyson Omni-glide™ vacuum

Dyson's first omni-directional soft roller cleaner head. Engineered for hard floors. Lightweight design glides into hard to reach spaces.

Floats and manoeuvres around obstacles

The articulating neck and four stabilising castors make it effortless to manoeuvre the Dyson Omni-glide™ vacuum around obstacles.

Engineered for hard floors

Both brush bars are covered in soft nylon to capture large debris, while black anti-static carbon fibre filaments simultaneously remove fine dust.

Our brand new format

Dyson technology, concentrated and rearranged in-line, allowing it to lie flat and clean into tight spaces.

Transforms to a handheld in one click

Quickly changes from a stick to a handheld vacuum cleaner and back again. For speedy spot cleans or versatile home cleaning.

Our first button-operated cordless vacuum

We've removed the trigger, so you can swap hands easily while cleaning around obstacles.

Wall dock

The Dyson Omni-glide™ vacuum drops into the wall-mounted charging dock, ready for your next clean.

dyson v11

Dust report shows presence of allergens inside Indian homes
Allergens are microscopic particles that can stick to dust and remain in soft furnishings, gaps in floor boards and tiny crevices. Sweeping and dusting may make surfaces look clean, but it can leave dust on surfaces.

Low-profile hard floor cleaning

The Laser Slim Fluffy™'s 250mm-wide brush bar and low profile help it reach further under furniture and into tight spaces.

Deep cleaning on rugs and carpets

The Direct drive cleaner head drives stiff nylon bristles deep into rugs and carpets to remove ground-in dirt.

Carbon fibre filaments

Black anti-static carbon fibre filaments on both cleaner heads extract dust from hard floors and crevices.

Two Cleaner Heads to deep clean anywhere.

Specialist Laser Slim Fluffy™ cleaner head engineered for hard floors. Direct drive cleaner head for all floor types.

Dyson V12 Detect™ slim Vaccums

(Iron / Nickel)

MRP: ₹ 58,900

dyson v11

The Dyson V11™ vacuum's three cleaning modes are designed for a range of tasks. So you have the right power, wherever you clean.

Easy to empty

It hygienically ejects all the dust and debris deep into the bin, in one action. So there's no need to touch the dirt.

Neatly stores and charges

Simply drop your Dyson V11™ vacuum into the wall-mounted charging dock, ready to grab and go again.

High Torque cleaner head for powerful floor cleaning

Dyson's most powerful cord-free cleaner head ever. Stiff nylon bristles drive deep into carpet to remove ground-in dirt. Soft, anti-static carbon fibre filaments capture dust from hard floors and crevices.

Cleans everywhere

Dyson cord-free technology makes cleaning easier all around your home.

SPECIFICATIONS

- **Cyclone technology** - 14 cyclones
- **Suction power** - 185AW
- **Bin volume** - 0.54L
- **Run time** - Up to 60 minutes³
- **Height** - 261mm
- **Length** - 250mm
- **Width** - 1286mm
- **Charge time** - 4.5 Hours
- **Weight** - 2.97kg

Complimentary Dyson-designed presentation case

Protects your hair dryer from dust, dents and scratches. Magnetic clasp for easy access. Encased in durable PU leather. Stores the Smoothing nozzle or Styling concentrator. Easy to clean.

Flyaway attachment

The ideal finishing tool for sleek, straight styles. Hides flyaways under longer hair to give you a smooth, shiny finish.¹ With just air.

Styling concentrator

The wider, thinner design³ of the re-engineered Styling concentrator creates a high-velocity blade of air that's perfect for styling. And because the air is focused, you can style one section at a time – without disturbing the rest.

Diffuser

Re-engineered to disperse air more evenly around your curls, the Diffuser simulates natural drying, helping to reduce frizz and define curls and waves. Longer prongs allow you to style more hair with greater control – and reach deeper into the hair.

Gentle air attachment

Engineered to be kinder to fine hair and sensitive scalps, the new Gentle air attachment diffuses the air, creating a gentle, cooler airflow – while still drying hair fast.

Smoothing nozzle

Dries hair with smooth, controlled airflow, helping to create a smooth, natural finish.

Designed for fringes, curls and straight styles Discover the limited gift edition Corrale™ straightener with Dyson-designed presentation case, Paddle brush and Detangling comb

Enhanced styling with cordless versatility Effective straightening requires both heat and time. The Dyson Corrale™ straightener delivers up to 30 minutes cordless styling⁴ with the thermal performance of a corded hair straightener. It fully recharges in just 70 minutes. And if you need to style for longer, just attach the cable for hybrid charge mode

Heating system with intelligent control

Flexible arrangement of electronics and thermal interfaces. Integrated sensor system regulates the temperature of the plates 100 times a second, so you never exceed your set temperature.

Cordless versatility, corded thermal performance

Powerful 4-cell lithium-ion battery delivers the thermal performance of a corded straightener, cord-free. Constantly monitored and controlled by an intelligent battery management system to optimise heat output.

Precision styling with half the damage¹

Manganese copper alloy plates, machined to the width of a human hair. The plates flex to gather hair neatly together, for enhanced styling with less heat.

Gentle air attachment

Engineered to be kinder to fine hair and sensitive scalps, the new Gentle air attachment diffuses the air, creating a gentle, cooler airflow – while still drying hair fast.

Smoothing nozzle

Dries hair with smooth, controlled airflow, helping to create a smooth, natural finish.

- **Negative ions** – Help reduce static
- **Sound Level** – 77 dBA
- **Power** – 1,600 W
- **Cable** - 9 ft

Curl. Wave. Smooth. Dry. With no extreme heat.

Airflow speed

Three precise airflow speeds, to suit your styling.

Heat control

Four precise heat settings, including constant cold shot.

Cold shot

Immediately deactivates the heating element, for cooler air to set your style.

Coanda to curl

The Dyson barrels harness an aerodynamic phenomenon called the Coanda effect, to attract hair and wrap hair. Styling with air, not extreme heat.

Coanda to smooth

The Dyson brushes use the Coanda effect to attract hair to the surface of the brush, propelling air along the hair strands for a smooth, straighter style.¹

Powered by the Dyson digital motor V9

The 13-blade impeller spins at up to 110,000rpm, generating 3.2kPa. Powerful enough to produce the air pressure needed to create the Coanda effect.

Intelligent heat control

Measures airflow temperature over 40 times a second, intelligently controlling the heating element to keep the temperature under 150°C. Preventing extreme heat damage.

Air Purifiers

Air purifier. Heater. Fan. All in one.
Removes 99.95% of pollutants as small as 0.1 microns.¹

Senses and reports, automatically

Integrated sensors constantly analyse your air, while our unique algorithm cross-checks data every second. It diagnoses pollutants at a molecular level, displaying live results on the LCD.

Captures gases and ultrafine particles

The HEPA H13 filter captures 99.95% of particles as small as 0.1 microns.² A layer of activated carbon also removes odours and gases including VOCs³.

Purifies the whole room

Dyson air purifiers have Air Multiplier™ technology. It generates the circulation power to draw even distant pollutants into the machine, projecting purified air throughout the room.⁴

Fully sealed to HEPA H13

In our latest air purifiers, it's not just the filter that meets HEPA H13 standard, it's the whole machine⁴. So what goes inside, stays inside.

Heats in winter

With long-range projection, it's quick to heat the whole room evenly.³

Cools you in summer

In warmer weather, a powerful stream of purified airflow can cool you down.

Draught-free diffused mode

Diverts airflow through the back of the machine. To purify, without cooling you.

Intelligent control and data

Control and monitor your air quality from anywhere using the Dyson Link app.⁵

Oscillates up to 350°

Adjustable oscillation projects purified air around the whole room.

In warmer weather, a powerful stream of purified airflow can cool you down.³

Draught-free diffused mode

Diverts airflow through the back of the machine. To purify, without cooling you.

Intelligent control and data

Control and monitor your air quality from anywhere using the Dyson Link app.⁵

Night mode

For lighter sleepers. Monitors and purifies using the quietest settings, along with a dimmed display.

Oscillates up to 350°

Adjustable oscillation projects purified air around the whole room.

Dyson Purifier Cool

AVAILABLE COLORS

SPECIFICATIONS

- **Height** 1050 mm
- **Cord Length** 1.8m
- **Width** 220 mm
- **Weight** 4.99kg

MRP: ₹ 56,900

Removes 99.95% of particles as small as PM 0.1.¹ Powerfully projects and circulates purified air.

360° Glass HEPA filter removes allergens, pollutants from your home.

Our filter is so effective that it captures 99.95% of pollutants and allergens as small as 0.1 microns.

Air Multiplier™ technology.

The impeller draws in air from all angles, passing it through the filter before accelerating it into the annular loop. With technologies found in turbochargers and jet engines, and using applied fluid dynamics, air is induced and entrained. This multiplies the initial airflow, projecting a powerful stream of smooth, uninterrupted, purified air.

The Dyson 360° glass HEPA filter. Now with tris-coated activated graphite.

The 360° Glass HEPA filter removes 99.95% of particles as small as 0.1 microns — that's roughly 100 times smaller than a human hair. The 360° intake has been engineered to pull in polluted air from every angle, whilst the Tris-coated graphite captures gases from your home, including odours, household fumes and formaldehyde.¹

H-13 Glass HEPA borosilicate filter.

We've packed over 6 metres of H-13 HEPA borosilicate microfibres into every Dyson filter. It's pleated over 200 times, to remove gases and 99.95% of allergens and pollutants as small as 0.1 microns.¹

Active Graphite filter.

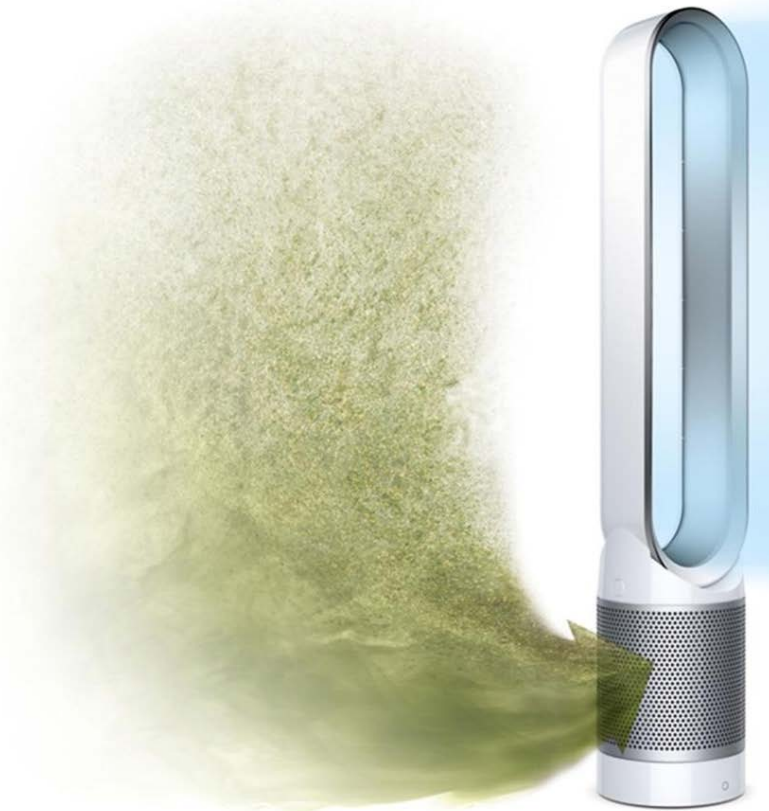

The filter has been engineered using a dense layer of carbon crystals, and treated with oxygen to make it more porous. This increases the carbon's surface area, further helping to trap gases, odours and domestic fumes – in a similar way to how a sponge absorbs water.

Tris coating.

After being treated with oxygen, each graphite crystal is coated with Tris. This organic compound's chemical reaction with potentially harmful gases like formaldehyde increases the graphite's ability to capture the gases, by as much as 70%.²

Dyson Pure Cool Link™ air purifier

MRP: ₹ 43,900

dyson lightcycle

Light quality that lasts decades

Without proper cooling, LEDs can quickly overheat, causing fading and discolouring. The Lightcycle™ task light uses Heat Pipe technology to efficiently cool the LEDs, protecting light quality for 60 years¹. This allows it to reliably adjust its colour and brightness.

Engineered to support your body clock

Tracks the colour temperature and brightness of the daylight where you live.

Light quality that lasts decades

Heat Pipe technology keeps six high-power LEDs cool enough to protect light quality for 60 years.¹

Designed to improve visual acuity²

Powerful light (over 1000 lux), with glare protection and low optical flicker³, surpasses recommended levels for studying.²

Intelligently adapts to you

Adjusts its light for your age, task and sleep times. Controlled by the Dyson Link app

Auto-adjusts to surrounding light

Ambient light sensor reacts to changes in background light, keeping your space at a constant brightness.

Senses motion, saves energy

Motion sensor switches light on when you're near, and off when you're away for 2 minutes.

Precision positioning

3 Axis Glide™ motion puts powerful light precisely where you need it: vertically, horizontally and through 360°.
